WUmail email configuration: native app (Android)

1. Open email icon

2. Enter your WUmail email address and password and click next.
3. Click OK at the Remote security administration pop up.
4. Edit settings such as period to sync email to 1 month, calendar to 3 months, etc.
5. Click Next.
6. Click Activate.
7. Click Done!
8. Your email will start to populate the app. Your native calendar should now contain your WUmail calendar.
